

libIGCM, operational running environment for ESM and its components.

Sébastien Denvil (IPSL, France)

Martial Mancip (IPSL, France)

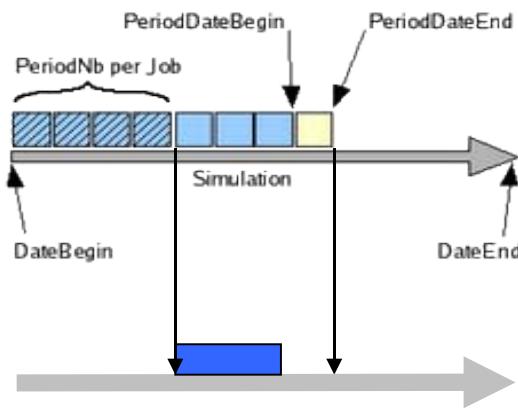

Patrick Brockmann (LSCE, France)

IGCMG

Pourquoi construire un SRE ?

- Simplicité
- Standards et conventions
- Portabilité
- Calendriers, fréquences variables
- Configurations
- Généricité : composantes
- Post-processing (déporté ou non)
 - Time series et MONITORING
 - Moyennes saisonnières et figures

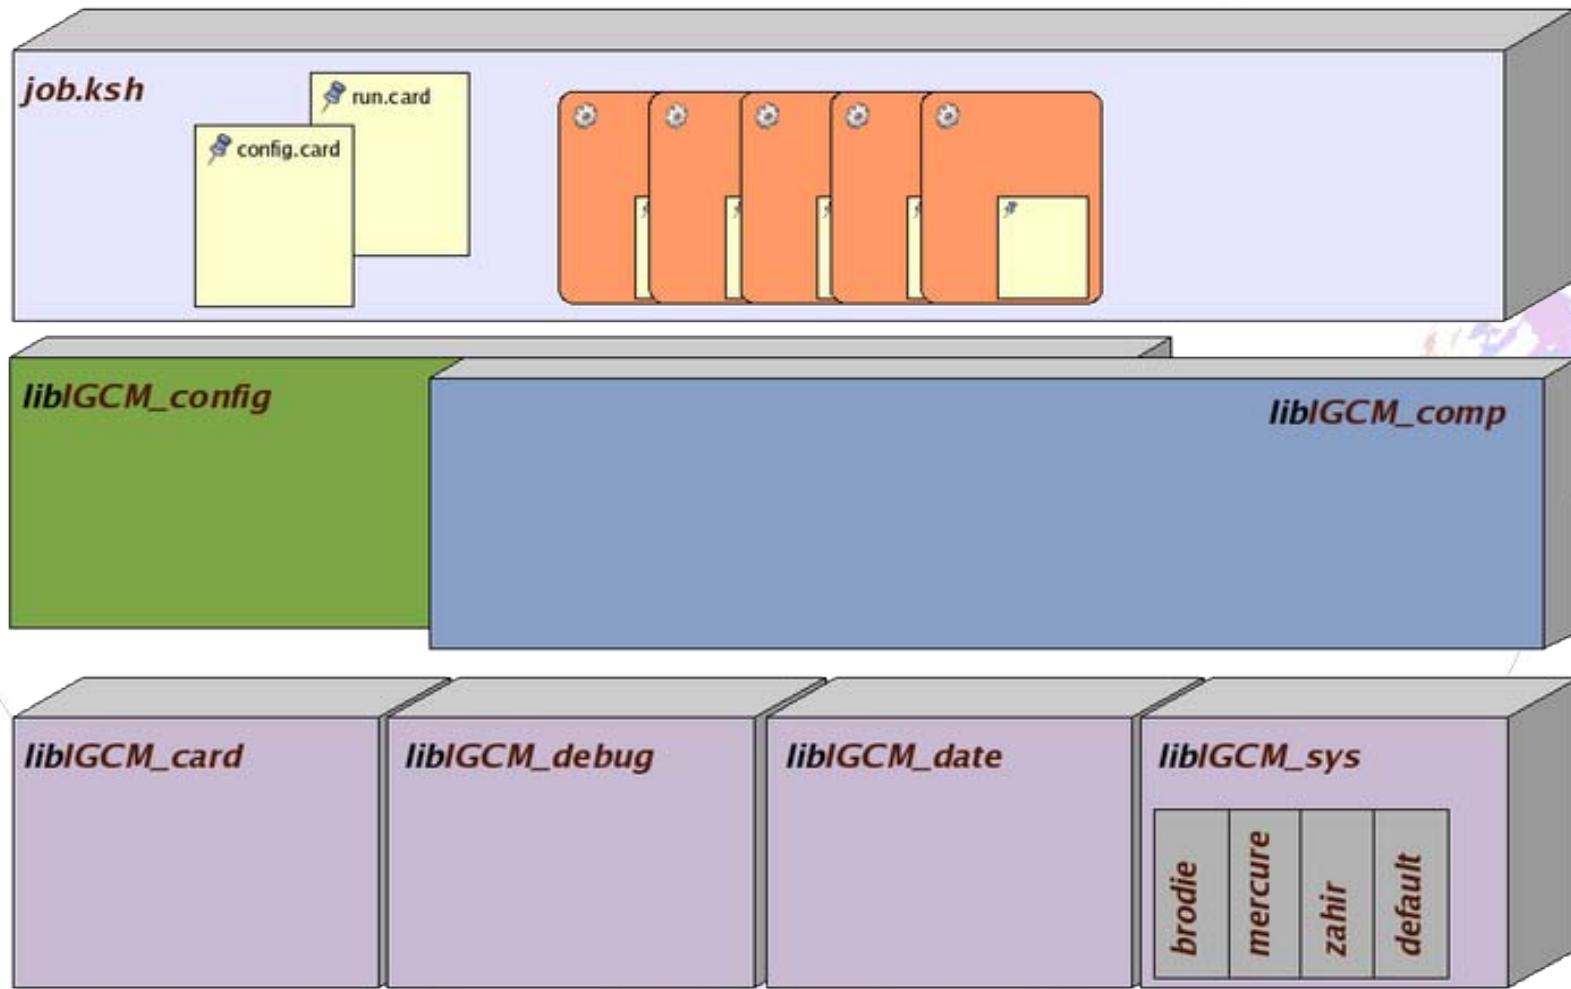

Le job

job.ksh

```
IGCM_config_Initialize  
IGCM_comp_Initialize  
IGCM_config_Check  
cd ${RUN_DIR}  
Period=1  
while [ ${Period} -le ${PeriodNb} ]; do  
    echo "Starting iteration ${Period}"  
    IGCM_config_PeriodStart  
    IGCM_comp_GetInitialStateFiles  
    IGCM_comp_GetBoundaryFiles  
    IGCM_comp_GetParametersFiles  
    IGCM_comp_GetRestartFiles  
    IGCM_comp_Update  
    ${MPIRUN_COMMAND} ${MPIRUN_OPTIONS} ./${Config_Executable_Name}  
    IGCM_comp_PutRestartFiles  
    IGCM_comp_PutOutputFiles  
    IGCM_comp_Finalize  
    IGCM_config_PeriodEnd  
    echo "Ending iteration ${Period}"  
    (( Period = Period + 1 ))  
    (( CumulPeriod = CumulPeriod + 1 ))  
done  
IGCM_config_Finalize
```

Les cartes et le système

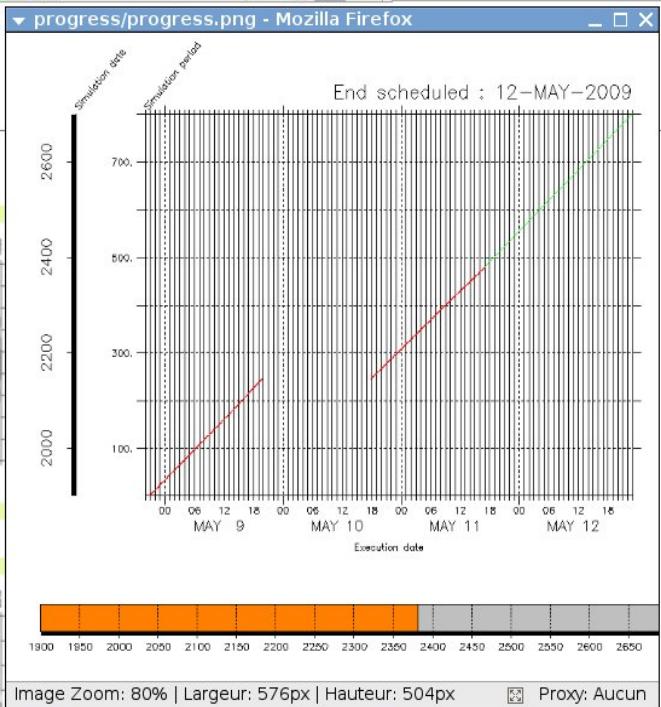

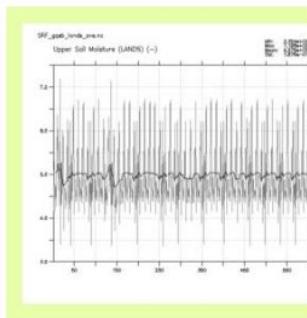

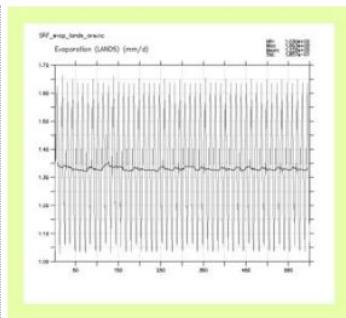

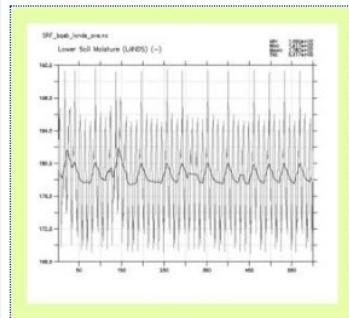

Is it working ?
